DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4, 8, 15-18, 22, 29-32 and 36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smith et al. in view of the examiner taking official notice.

As per claims 1, 2, 8, 15, 16, 22, 29, 30 and 36, Smith et al. disclose level determining means....., transmission control means..... and transmission disabling means..... (see at least the abstract). The examiner takes official notice that the remaining features are well known in the prior art. It would have been obvious to anyone having an ordinary level of skill in the art at the time the invention was made to have included these limitations in the instant invention since many practical systems allow various users on the system, thus the need for storing the user's information and authenticating them for use on the system.

As per claims 3, 17 and 31, the examiner further takes official notice that these features are well known in similar systems for identification of users.

As per claims 4, 18 and 32, again see at least the abstract.

Allowable Subject Matter

Claims 43-57 are allowed.

Art Unit: 2132

Claims 5-7, 9-14, 19-21, 23-28, 33-35, 37-42 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

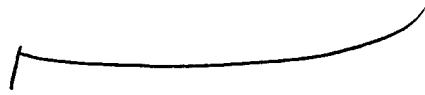

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent No. 5,574,786 to Dayan et al.

U.S. Patent No. 6,298,445 to Shostack et al.
